

Project Details

Location: Manchester

Product: UNITY SF & ULTIMA 4

Finishes: Anodised aluminium in Regency Gold

Featuring a dynamic combination of Gold Anodised Perforated UNITY SF panels fixed to the specially engineered ULTIMA 4 spandrel system, this project presented both aesthetic and technical challenges. The intricate perforated pattern of each panel seamlessly fits into the building's design, transforming the entire facade into a work of art. This bold, innovative cladding solution not only enhanced the building's visual appeal but also set a new benchmark for complex rainscreen systems.
