

1 Valentine Place

Project Details

Location: London

Products: ULTIMA Insulated Spandrel Panels, Feature Beam

Finishes: Specialist blue grey anodised finish

Specialist architectural metal fabricator Metalline have added the finishing touch to the exterior envelope of an award winning building in London. Number One Valentine Place is a new grade A office building and winner of the 2013 New London Architectural Award for an office building. The external façade of the property features a range of aluminium pressings, glazed in ULTIMA aluminium insulated panels and Feature Beam, Metalline's renowned aluminium beam, along with fifty aluminium fins specifically designed to offer solar shading for the building's south facing position. All pressings and panels were finished in a specialist blue grey anodised finish where Metalline's superior application and expertise are becoming renowned with architects and contractors throughout the UK.
